

YOUNES ZAHFOUF

Full Stack Developer (PHP /Symfony)

Casablanca, Morocco | +212 649 486 542 | contact@youneszahfouf.com

PROFILE

Full Stack Developer (php/symfony) with 3 years of professional experience building ERP systems, WordPress websites, and custom business applications. I specialize in developing solutions that improve business operations, automate workflows, and deliver intuitive user experiences tailored to client needs.

Throughout my career, I have worked closely with clients to understand their business requirements and translate them into scalable, reliable, and maintainable software. My experience spans PHP, Symfony, Laravel, WordPress, REST APIs, MySQL, and modern web technologies, allowing me to deliver complete solutions from concept to deployment.

I combine strong analytical thinking, effective communication, and AI-powered development tools to increase productivity and solve complex business challenges. Curious, adaptable, and committed to continuous learning, I quickly master new technologies and development environments while maintaining a strong focus on delivering high-quality software that creates real business value.

PROFESSIONAL EXPERIENCE

Software Developer – TechTrend Solutions

July 2023 – May 2026
